

# Verification

The Corporate Carbon Footprint of

Nomad Foods Europe Limited

including the locations listed in Annex I has been verified for the time period between 01/01/2025 and 31/12/2025 according to the requirements of the standard

## Greenhouse Gas Protocol

### A Corporate Accounting and Reporting Standard

Revised Version (2004)

The verification has been performed according to the DIN EN ISO 14064-3:2020-05 requirements. The greenhouse gas inventory includes scopes 1, 2 and significant scope 3 emissions. A detailed description is included in the greenhouse gas report "Nomad Foods Greenhouse Gas Declaration" in the version 2.3 from April 2026.

**The total market-based emissions amount to 338,687 t CO<sub>2</sub>eq ± 5% \* (in 2025).**

The objective of the verification was to give a reasonable assurance about the greenhouse gas emissions. The necessary information was extracted from the greenhouse gas declaration and the data analysed has been verified with reasonable assurance and accuracy on the basis of historical and hypothetical data and within the relevant system boundaries.

Based on the processes and procedures performed, it can be confirmed that the statement on greenhouse gas emissions is accurate, contains the relevant greenhouse gas-related data and information, and complies with the normative requirements for the quantitative determination, monitoring and reporting of greenhouse gases or relevant national standards or practices.

This certificate is based on the auditing project C-26-23278.

Berlin, 28/04/2026

Prof. Dr.-Ing. Jan Uwe Lieback  
Director

Susanne Moosmann  
Lead Auditor

\*including water and waste emissions from the locations. The transport to the warehouses and the purchased electricity for Warehousing are also considered.

No. C-26-23278

Annex I: The scope of the certificate No. C-26-23278 for the organisation

## Nomad Foods Europe Limited

includes the following locations:

\*district heating emissions are the same via both the market based and location based approach. We have separated out the district heating emissions to demonstrate that our Scope 2 emissions from electricity across our Legacy business is equal to zero.

The allocation of energy and water consumption is as follows:

| <b>Total Energy Consumption,<br/>purchased &amp; self-generated,<br/>absolute in kWh</b> | Nomad Foods<br>Legacy | Findus CH | Adriatics  | Nomad Foods<br>Total |
|------------------------------------------------------------------------------------------|-----------------------|-----------|------------|----------------------|
| Total Energy consumption                                                                 | 545.689.370           | 6.654.833 | 57.543.273 | 609.887.476          |
| Total Energy consumption from non-renewable sources                                      | 391.177.734           | 6.654.833 | 23.171.250 | 421.003.817          |
| Total Energy consumption from renewable sources                                          | 154.511.635           | -         | 34.372.023 | 188.883.658          |
